

**For Enterprise Solution powered by Windows 7 Embedded (WES7)**

**M6024 / X6024 / S6024 RAID Application (3.5" SATA)**

note: According to HDD vendors, M6024/X6024 should not use NAS Series, which supports up to 16-bay NAS system only, Please check HDD datasheet for detail information.

**Note:**

1. M4000 Series should install enterprise-level hard disks if more than 4 hard disks.
2. M95 Series includes each a 2.5" and 3.5" hard drive tray.
3. Generation M3004 Series extend capacity only up to 4TB.
4. GVD would not guarantee for the system performance if user chooses to use the HDD model which is not recommended by GVD.
5. GVD always recommends the use of Enterprise Class SATA Hard Drivers for GVD Enterprise NVR, Failover Server, Backup Server, extended storage for enterprise Class SATA Drivers Support TLER (Time Limited Error Recovery), Higher MTBF, Higher Duty Cycles and typically include a sensor for rotation and vibration.
6. According to HDD vendors, M6024 should not use NAS Series, which supports up to 16-bay NAS system only, Please check HDD datasheet for detail information.
