# SNC-VB770

## Fixed Type 4K Camera

# Ultra High-Sensitivity 4K Network Camera with 35mm Full-Frame Exmor® CMOS Sensor

# Shown with optional lens

## **Product Highlights**

- 12 Megapixel 35mm Full Frame Exmor CMOS Sensor
- Ultra-high sensitivity: minimum illumination 0.004 lx @ 30 IRE, or 0.006 lx @ 50 IRE
- Sony's unique image processing engine achieves extremely high sensitivity and low noise at the same time
- E-mount lenses to optimize 4K high resolution and performance (sold separately)
- 4K or Full HD 30 fps smooth color video in near pitchblack conditions

- 4K (3840 x 2160) H.264 with dynamic or static regions of interest coding for bandwidth and storage efficiencies
- Intelligent Cropping and tracking, using built-in motion detection for up to 2 FHD or 4 VGA native resolution crops
- SD card slot
- 12MP evidence shot for greater detail analysis
- View-DR® Technology for wide dynamic range of 100 dB
- PoE, AC 24V or DC 12 V operation

#### **NEW FEATURES**

#### Extraordinary sensitivity with 4K

The SNC-VB770 4K network camera achieves a minimum illumination of 0.004 lx by using its highly sensitive 35mm full-frame Exmor® sensor, optimized E-mount lenses (sold separately) to maximize the performance of the sensor, and its unique signal processing engine. This enables the camera to capture crisp, clear 4K/30 fps color video with much less noise in extreme low-light conditions.

#### Automatic selection of picture settings

Intelligent Scene Capture to automatically adjust and adapt the picture's brightness and color, depending on time and day, weather and lighting conditions to

achieve the best picture quality. To further support all of the varying conditions and picture preferences, manual setting modes are available, or predefined picture settings can be scheduled or recalled to record at specific times, or based on external triggers, or lighting conditions.

## Bandwidth and storage efficiencies

When resolution goes up, bandwidth consumption also increases. This makes deploying 4K cameras more expensive and more challenging than deploying HD cameras. Sony's camera features address those concerns:

- Intelligent Coding to keep specific areas of interest in the scene clear and crisp, while lowering the image quality of the other parts using a high compression ratio, allowing the overall bitrate for the entire image to be reduced by up to 50% (4K/30fps, areas of interest 30%), therefore helping to minimize storage costs.
- Intelligent Cropping to simultaneously observe up to four specific areas of "regions" of interest in any captured images with a 4K-native resolution, while viewing the entire image in Full HD resolution. This allows the network bandwidth to be reduced by up to 50%, thus helping to minimize storage costs.

## Intelligent Coding

AK-native resolution
 Other Areas of Image:
 Low resolution with high compression ratio

Areas of Interest:

- Multi Tracking to automatically track objects specified by the Intelligent Coding or Intelligent Cropping function – a compelling alternative to conventional monitoring that normally requires multiple PTZ cameras to track several objects simultaneously.
- Evidence Shot for high-quality recording with 12 megapixel resolution to help examine the scene and produce evidence – ideal for collection and analysis of high-quality evidence in situations like city surveillance, parking lots and garages.

12 Megapixels (Simulated images)

#### **DIMENSIONS**

# UNI-E2DG8 4K SECURITY CAMERA ENCLOSURE

- The UNI-E2DG8 is an IP66 rated, outdoor, vandal-resistant, fixed camera housing with a heater and blower
- Compatible with Sony's SNC-VB770 camera
- The blower runs continuously to provide airflow to keep the camera cool and the window virtually fog-free
- The heater automatically activates at 4.4°C (40°F) and deactivates at 15.5°C (60°F) with a thermal cut-off switch assuring safe heating operation
- The enclosure also includes a pole-mount adaptor as a standard accessory
- Compatible for a maximum combined camera and lens length of 317.5mm (12.5 inches)
