

Smart and simple cabling solutions

19" RACKS AND ACCESSORIES

Exclusive design for greater functionality

member of the TKH Group <

MMC, INNOVATION BACKGROUND FOR MANY YEARS

INNOVATION AND QUALITY

As a manufacturer of structured cabling solutions since 1993, Multimedia Connect develops communication solutions facilitating IP convergence.

Quality and innovation are two of Multimedia Connect's key principles in offering products suitable for environments such as "intelligent buildings", datacentres and industrial networks.

Headquarters

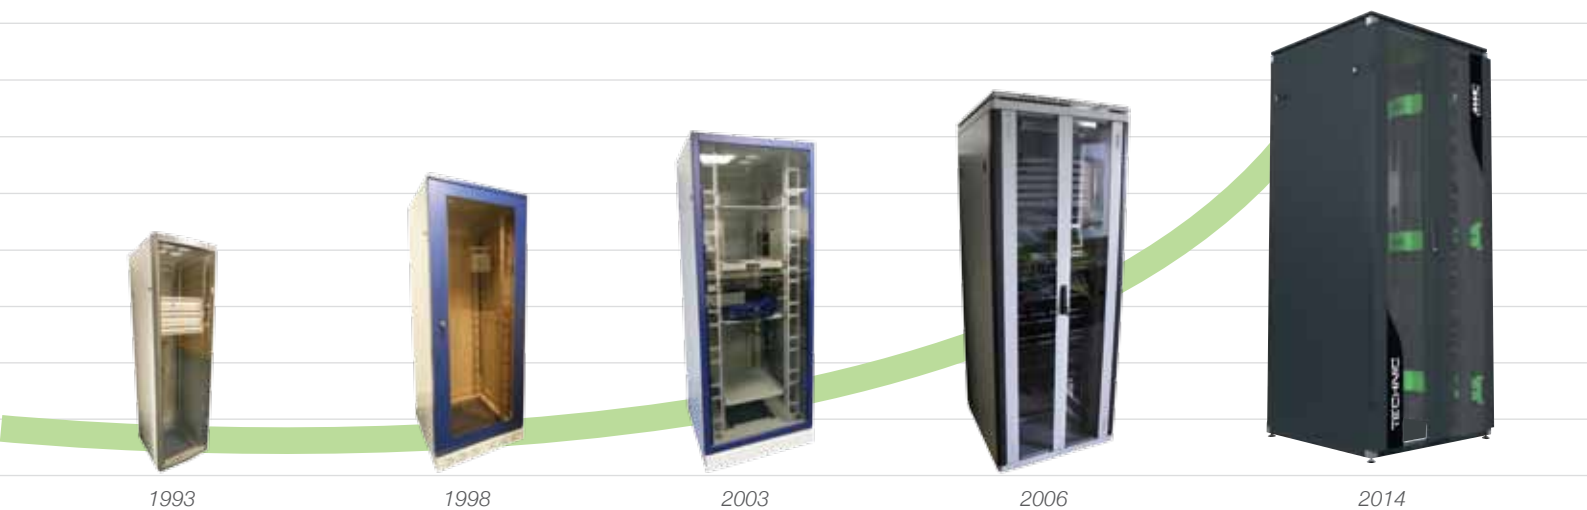

Preform factory for fibre optics

RECOGNIZED KNOW-HOW

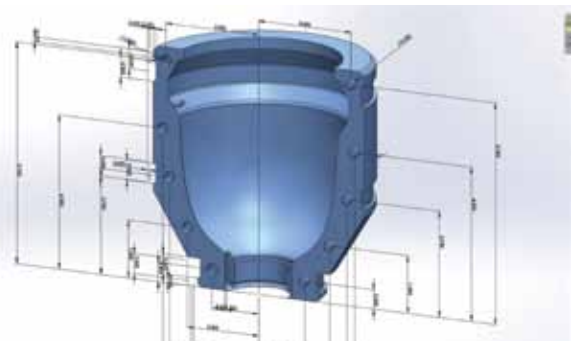

Since its foundation, Multimedia Connect has specialised in the manufacture of cabinets and racks for networks.

In response to the demands of an ever-changing marketplace, Multimedia Connect adapts its products to suit the needs of its customers. Drawing on its experience, Multimedia Connect is now offering a new range of racks combining aesthetics and functionality.

EXPERTISE BENEFITING INSTALLERS AND USERS

Collaboration between Multimedia Connect's R&D office and a study group composed of installers and users has enabled the production of a range of racks which respond very closely to everyday needs, while also offering a price-quality ratio which is among the best on the market.

RACKS AND ACCESSORIES CONCEPT

A COMPLETE RANGE TO MEET EVERY REQUIREMENT

Multimedia Connect provides a product solution which responds perfectly to every technical requirement in structured cabling installations.

The range of racks comes in 3 lines :

Classic

Low density cabling

TECHNIC

Technical room cabling

SERVER

Data centre environment

Three fundamentals enable Multimedia Connect to meet the challenges faced by installers and users :

FUNCTIONALITY

Priority is given to cable and cord management, by simplifying integration, cabling accessibility and modularity.

INTEROPERABILITY

The shared framework of the racks means perfect compatibility of the accessories with all rack lines. This interoperability makes it easy to combine accessories on the same site.

CONVENIENCE

Available in pre-assembled flat pack mode, taking up 70% less room, facilitating storage and handling.

MODERN DESIGN

The design of the racks has been developed in collaboration with an automobile designer. Boasting a dynamic and exceptionally modern form, Multimedia Connect racks provide a visual dimension which enhances your network.

RACKS AND ACCESSORIES CONCEPT

FLAT PACK MODE: REDUCED SPACE FOR GREATER EASE OF INSTALLATION

Lines concerned :

Classic

Low density cabling

TECHNIC

Technical room cabling

Multimedia Connect racks can be provided unassembled. This “flat pack” mode, 70% pre-assembled, facilitates storage and handling, thereby simplifying access to tight spaces.

Pre-assembly enables fast set-up of the rack: It takes just 10 mins to assemble.

- **Easy handling**
- **A 70% pre-assembled rack**
- **Assembly time of less than 10 mins**
- **Reduced storage space**

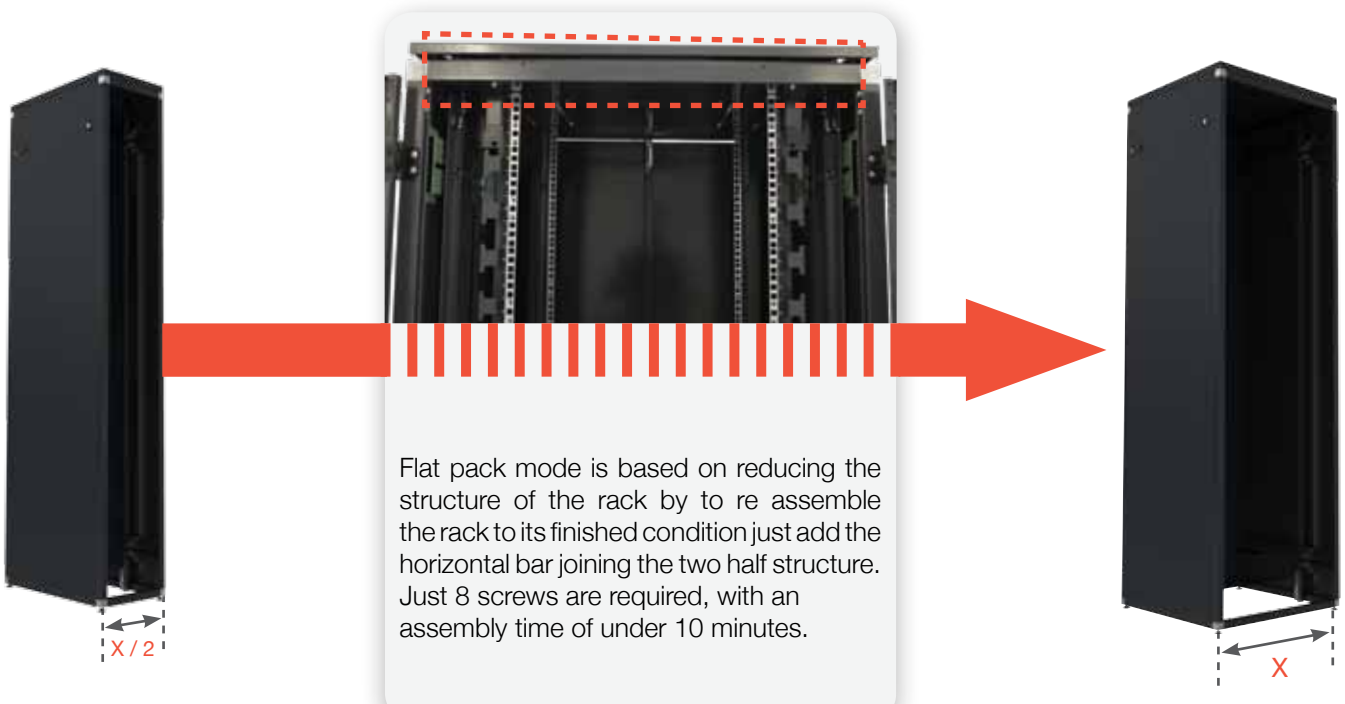

10 minutes

RACKS AND ACCESSORIES OVERVIEW

A SOLUTION ADAPTABLE TO ALL CABLING AND STORAGE REQUIREMENTS

Multimedia Connect provides a product solution meeting all the requirements of your buildings, including technical rooms, floor rooms, datacentres, etc.

LOW DENSITY CABLING :

- Load capacity of 500 kg.
- Excellent price/port ratio.
- Protection of network from external attacks.

SOLUTION : Rack **Classic**

TECHNICAL ROOM CABLING :

- Load capacity of 800 kg supporting cabling and active parts.
- High port density management for both installation and maintenance.
- Optimal combination to ensure long-term organisational sustainability.

SOLUTION : Rack **TECHNIC**

DATA CENTRE ENVIRONMENT :

- Load capacity of 1000 kg for servers and exchanges.
- Top-of-Server and Beside-Server configuration options.
- Optimised ventilation and management of rear mounting depth.

SOLUTION : Rack **SERVER**

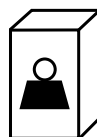

Classic

THE CLASSIC CABLING RACK

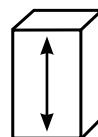

The Classic rack from Multimedia Connect is a product which responds perfectly to the technical requirements for cabling and installation, while also offering an excellent quality-price ratio. The different option available for Classic cabinet allow an easy cabling and bring fonctionnality for the installer.

BENEFITS

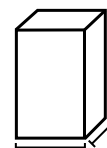

- Load capacity up to 500 kg.
- Roof opening for easier access to cables.
- 180° door opening for greater accessibility.
- 19" rear mounting available on request
- Cable management available (option)

RACKS AND ACCESSORIES OVERVIEW

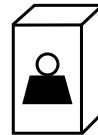

TECHNIC

BRINGING TECHNICAL SOPHISTICATION TO THE CABLING RACK

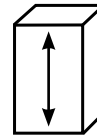

The Technic rack from Multimedia Connect has been designed to facilitate cabling and allow the installer to save considerable time. The vertical Us available on the front mounting allow a separation to be created between the data cables and the PDU's strips.

BENEFITS

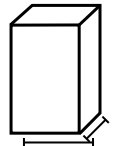

- Reinforcing cross beam designed to increase the load capacity to 800 kg.
- Vertical cord management guide.
- 12 Us available vertically on the 800 width version.
- 180° door opening for greater accessibility.
- Brush cable enabling up 550 mm opening on each side of the roof.

SERVER

A RACK OPTIMISED FOR STORING YOUR SERVERS AND ACTIVE EQUIPMENT

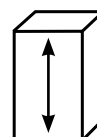

The structure of the Server rack from Multimedia Connect is fitted with reinforcement beams designed to allow a load capacity of 1000 kg while maintaining perfect stability. Wide openings equipped with brush cable grommets along the entire depth of the rack offer improved accessibility in the case of Top-of-Server configuration.

BENEFITS

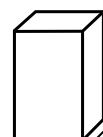

- Cross beams designed to increase load capacity to 1000 kg.
- 12 Us available vertically.
- 180° door opening for greater accessibility.
- Brush cable along the entire depth of the rack.

RACKS AND ACCESSORIES OVERVIEW

19" ACCESSORIES: A RANGE OF ACCESSORIES FOR A COMPLETE 19" SOLUTION

All 19" accessories in the Multimedia Connect range are compatible with all racks: Classic, Technic or Server. These accessories are devised by our R&D team and developed in our factory to provide the broadest and most complete range of 19" panel products possible.

VENTILATION PARTS

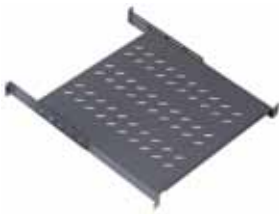

ACBxV : 2 or 4 fan unit

ACTHERMOST : thermostat for ACBxV

FIXED AND SLIDING PANELS

BPF1UxxxAD : adjustable panel
depth 450 or 550

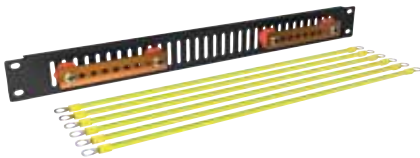

BPG1U550 : sliding panel

BSERVPF720 : panel for rack server

SAFETY PARTS

BMASSE19 : Earthing kit

ACCASTOR : Wheel kit for rack

ACxSERVBASC : anti-tip base
