

BCPAN1UV48P

Angled patch panel 19" 48 ports - 1U - keystone type

APPLICATION

The BCPAN1UV48P is the copper solution for the high density application. Thanks to the low dimension of our BCTL connectivity, the BCPAN1UV48P offer 48 ports on 1U. The angled designed allow an easy management of the patch cord front of the cabinet with management rings on each side of the panel.

The rear support bar was studied to permit the fixing of 48 cables.

DESCRIPTIONS

Angled patch panel with 48 ports on 1 Unit, dedicated for a big port density on the cabinet:

- 48 ports on 1 Unit
- Angled patch panel equipped with rings to improve a better the management of the patch cord
- Optimisation of the space on the cabinet : 1U instead 3U (no need management panel)
- Front face on hinge to improve the storage and to have the possibility to connect on flat
- Label holder to allow the identification of the 48 ports
- Keystone type
- Direct grounding
- Equipped with a rear support management cable with "T" form holes to fix 2 cables simultaneously : on the top and on the bottom of the support
- Supplied with rings and screws (type M6)
- Cold rolled steel 16/10

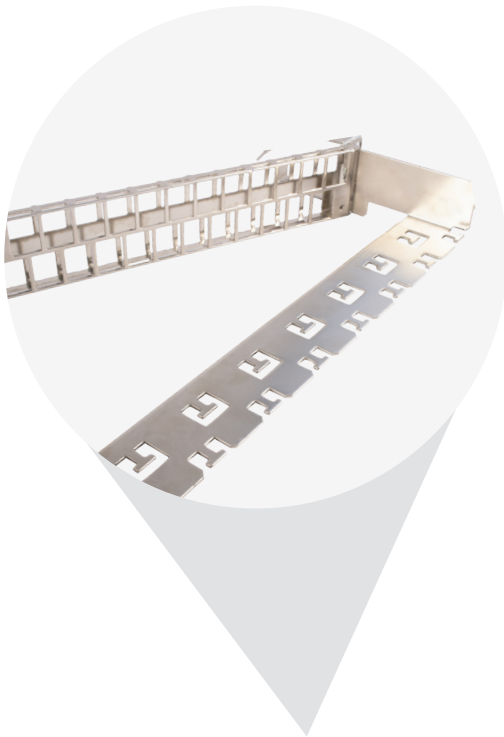

BCPANIUV48P

Angled patch panel 19" 48 ports - 1U - keystone type

FEATURES

Rear support bar especially studied
for the fixing of 48 cables

Cable rings to permit a good bending
radius of the patch cords

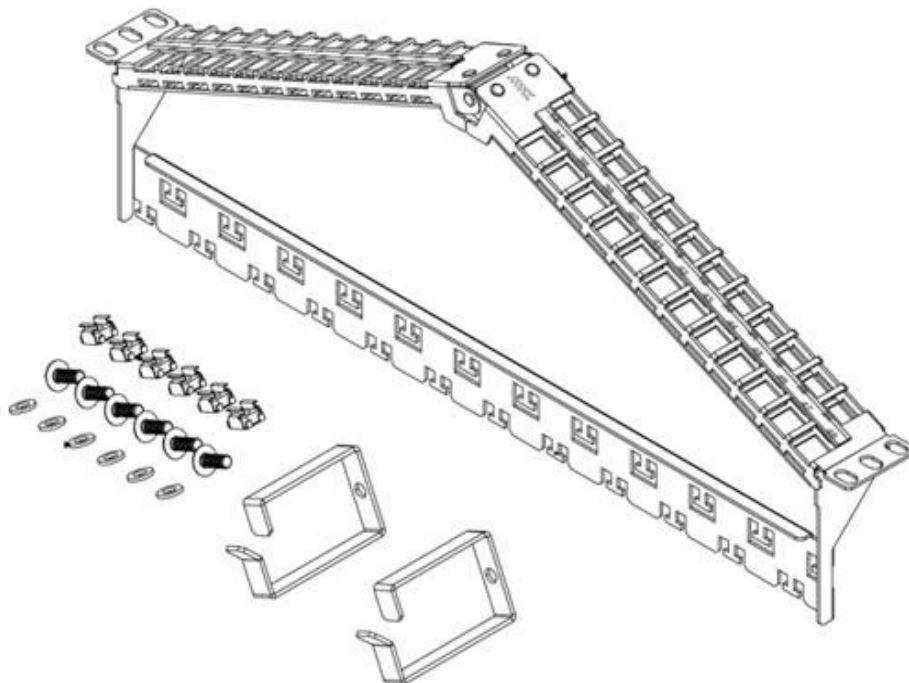

Angled designed to allow an easy management of the patch cords
